Chapter 5

5.1   Yes, our system does allow users to change their password by using the `passwd` command.

5.2   Assuming that the directories are to be created in the current directory, use the following commands to create the three directories.

```
$ mkdir courses
$ mkdir sample
$ mkdir personal
$
```

The command for setting the access privileges described in the exercise is `chmod 740 sample.`

5.3   No solution needed.

5.4   No solution needed.

5.5   No solution needed.

5.6   No solution needed.
